Employment Trends
Billings SMSA
1976-1985

I. EMPLOYMENT BY INDUSTRY

Overall employment is estimated to increase by 17,070 between 1976 and 1985. The Billings growth between 1976 and 1985 calculates to be a 37.7 percent increase which is greater than the statewide projected increase of 32.6 percent and Great Falls SMSA increase of 21.4 percent. The energy related industries growth in eastern Montana is a big attribute for Billings to grow faster than the statewide projections.

During recent years economic growth and emphasis with respect to jobs has shifted away from goods producing industries (agriculture, mining, contract construction, and manufacturing) to service producing industries (transportation, communications, public utilities, wholesale and retail trade, finance, insurance, real estate, services, and government). This is indicated by the 1976-1985 anticipated employment change with service producing industries increasing by about 15,000 and goods producing industries enlarging by about 2,000.

1. Agriculture, Forestry and Fisheries

Agriculture workers, estimated at 1,630 in 1976, are projected to drop to 1,245 in 1985. Increased mechanization, continuing trend of the vanishing farmer, and improved production practices lowers the demand for farm workers rather than a depressed industry status situation.

2. Mining

Mining is the smallest industry sector and will remain such through 1985. Increased employment will occur mostly in petroleum and natural gas and nonmetallic mining industries.

3. Construction

The trend for construction employment is projected to increase by 1,338 through the 9 year study period. The average annual employment growth of 3.9 percent between 1976 and 1985 should be considered a general trend estimate due to wide fluctuation in the construction industries activity.

4. Manufacturing

Slightly more than one-third of the goods-producing industries employment is involved in the manufacturing sector that anticipates a moderate growth of 23.1 percent over the study period. Food and kindred products industries and petroleum refining will be the larger nondurable products gainers, and durable products employment expansion leaders include fabricated metal products and saw and planing mills.

5. Transportation and Public Utilities

Transportation, communications, and public utilities industries expects employment enlargement of 1,000 from 1976 to 1985, with the transportation sector absorbing 50 percent of this expansion total.

6. Wholesale and Retail Trade

The 6,566 employment increase in the wholesale and retail industries is the largest increase of the major industry groups for

the study period. Also, the 47.3 percent increase in employment for the wholesale and retail industry represents the second largest major group increase. General merchandise and eating and drinking places will expand by 2,877 between 1976 and 1985 which amounts to about 44 percent of the total expansion.

7. Finance, Insurance and Real Estate

Leading the net percentage change for the larger industry categories is the finance, insurance, and real estate industry group. Nearly 1,100 new jobs will be created in this group during the study period. The banking industries will absorb the most new positions with a 566 projected increase.

8. Services

Second in numeric increase for the industry group are the service industries with 5608 projected new jobs. This amounts to a 39.9 percent increase from 1976 to 1985. Among the industries subgroupings that will expand the fastest are hotels and lodging places, miscellaneous business services, motion picture theaters, medical and other health services, and engineering and architect services.

9. Public Administration

The government employment expansion will be more moderate from 1976 to 1985 (37 percent increase) as compared to the 1970 to 1976 increase (44 percent) as the pressure to hold down government cost occurs. This group is forecast to increase by 838 employees during the study period. State workers will expand faster than federal and local government workers.

II. OCCUPATION EMPLOYMENT

Total annual average job openings in the Billings SMSA are estimated at 3,702 over the 9 year study period. Openings due to growth consist of 51 percent or 1,895 of the total and 1,806 annual openings will be created by separations. Thus, for every 100 new jobs created by industry growth there will be about 98 openings due to separations.

In grouping occupations into type of worker, the white collar worker (professional, technical, managers, sales workers, and clerical workers) trend dominates the numeric increase in employment which includes 60 percent of the 17,065 total occupational growth. Blue collar workers (craft and kindred, operatives, and nonfarm laborers) expect to grow by 33 percent through the 9 year study period. Service workers employment is expected to increase by 3,028 from 1976 to 1985 for a 10,072 total in 1985. The 42.9 percent increase in service workers is one of the larger group increases during the study period. Clerical workers expansion will be the largest percent increase for the occupational group, and the big increase in paper work required by the various industries is a major factor. Farmers and farm workers are the only major occupational group to record a decline from 1976 to 1985. Farm managers are the only type of farm worker that will have an increase in employment.
